

PROOF OF QUALITY - TÜV CERTIFICATES

The management of company Metech Ltd invests in technology development to match the market requirements. The main objective is to establish standards that confirm the products comply with the requirements of customers.

Realizing the importance of QMS, company Metech implemented the quality standard ISO 9001: 2008. It is used and generates all the requirements of the standard and as a result has been certified EN ISO 9001: 2008 (Quality Management System) issued in 2014 by the certification body TÜV Austria Cert GmbH.

Every year Metech has external verification from certification body and receives approval for proper implementation of the standards within the company.

Metech has recently developed and innovated welding processes. In 2016 Metech received the certification EN ISO 3834-2 (Quality requirements for welding of metallic materials) and EN 15085-2 (Railway applications – Welding of railway vehicles and components) by the certification body TÜV SÜD. The company proves that there is a controlled welding process, trained staff and personnel who can meet the requirements of product quality, made by welding process.

TÜV Certificates are a signal to our customers and partners that we are continuously producing high quality products which shows that customers will receive the service just in time.
